

## STATE TRAPPING REPORT CARD:

**KANSAS**

Leaderboard position: Joint 17th place of 23

Score: 12/100

Scoring Criteria	Status	Potential Score	State Score
Body-gripping trapping prohibited for recreational and commercial purposes	No	25	0
Body-gripping trapping prohibited for government agencies or other purposes	No	15	0
Leghold trap prohibited	No	8	0
Conibear trap prohibited	No	8	0
Snares prohibited	No	8	0
Bait prohibited	No	6	0
Restriction on number of traps	No	6	0
Bobcat trapping prohibited	No	5	0
Bear trapping prohibited	Yes	5	5
Otter trapping prohibited	No	5	0
Mandatory 24-hour check time (land)	Yes	2	2
Mandatory 24-hour check time (water)	Yes	2	2
Trapper license required	Yes	1	1
Trapper report required	No	1	0
Trap ID required	Yes	1	1
Trapper education required	Yes	1	1
Non-targeted animals reported	No	1	0
		100	12

2019/2020 Trapping Season Data	Response
Number of trapping licenses issued	6,000
Number of staff members with responsibility to monitor/enforce trapping regulations	Approximately 200
Number of complaints received about alleged illegal trapping	Information not collected by state
Number of times legal action was taken to control illegal trapping	53
Number of animals unintentionally trapped	Information not collected by state

**State National Wildlife Refuges Allowing Trapping**

Marais des Cygnes National Wildlife Refuge

### IMMEDIATE ACTION REQUIRED:

- Introduce mandatory record-keeping, including trapper reports and non-target animal reports.
- Make trapping licensing and enforcement data easily accessible and publicly available.
- Work with USFWS to end trapping on refuges and other public land.

### SHORT TERM RECOMMENDATIONS:

- Implement ban on leghold traps.
- Implement ban on Conibear traps.
- Implement ban on snares.

### MEDIUM-TERM RECOMMENDATIONS:

- Implement ban on trapping for recreational purposes.
- Implement ban on trapping for commercial purposes.

### LONG-TERM RECOMMENDATIONS:

- Implement ban on government agency body-gripping trapping in favor of humane and non-lethal control methods.

North Dakota	7	22nd
Maine	6	23rd (Joint)
Texas	6	23rd (Joint)

### NOTES ON SCORING

Scores are weighted towards measures that make a tangible impact on animal welfare or those that meaningfully limit the number of animal deaths. For example, statewide prohibition of recreational and commercial trapping dramatically reduces the number of traps laid and thus limits animal suffering and death. For this reason, a high score is given if this measure is met. Mid-range scores are given for prohibition of particular types of cruel traps (such as leghold, Conibear, or snare traps) as these measures may significantly reduce suffering. Lower scores are given for administrative measures such as mandatory record-keeping. While these are important factors for oversight and accountability, having them in place does not mitigate or reduce suffering or death directly. A perfect score of 100 would be achieved if all body-gripping trapping activities are prohibited within the state. No state scored 100 in 2021.
